

Super Trump®

Liquid Detergent Concentrated Formula for Dishwashing Machines.

Consult your Ecolab representative for instructions for specific use.

SECURITY WARNING:

Before using this or any other product, make sure that your employees read and understand the product label and material safety data sheet (MSDS) - both contain warning about the risks and instructions for appropriate first aid.

- **It's concentrated formula removes all dried on food**
Super Trump is a super concentrated formula of high alkalinity that is very effective in any condition of dirt: slight, medium or intense. It removes soil from foods such heavy fat, protein and starch that other detergents cannot remove. You benefit with excellent results that are obtained with a single pass through the dish washing machine.
- **Reduces spotting and scratches**
Super Trump contains special agents of conditioning water to minimize stains and scratches.
- **The automatic dispenser is easy and economical**
Super Trump can be dosed automatically and directly from the container. Dosing is a simple but secure, in that the product is pumped directly into the dishwashing machine.
- **It is recommended for washing cups and bar glasses.**
Besides its application in the dishwashing machine, Super Trump gives excellent results in the automatic washing of cups and bar glasses. It removes all the soil from food, streaks on glasses, even lipstick and other difficult stains. (Because of its high concentration, Super Trump should not be used in manual washing of cups and glasses.)
- **It is effective in cleaning stove vents and filters.**
Super Trump is a very effective detergent for use in cleaning air vents and stove hoods. It penetrates the layer of fats and oils and removes them. The result is a set of filters and vents that are cleaner and more efficient.

INSTRUCTIONS FOR USE

For applications in the machine dishwasher that your Ecolab representative installed and calibrated to the proper dosage. When the container is empty, remove the suction hose and place in the new container. If the product made contact with your skin or clothes, wash it immediately. Seal the container and dispose of properly.

For washing bar glasses and for the cleaning of stove hoods and ducts, your Ecolab representative will instruct your staff how to connect to the existing dispenser system.
